POLYFORMITALIA™

HOME EDITION

La **POLYFORM ITALIA** nasce con una forte connotazione artigianale.

E la differenza va sottolineata perché ciò che viene fatto per produrre i divani **POLYFORM ITALIA** è il risultato di un processo assolutamente artigianale. Le macchine ci sono, non potrebbe essere altrimenti, ma i prodotti **POLYFORM ITALIA** sono pezzi unici, se non nella produzione vera e propria quanto nella progettazione, nella cura e nella "artigianalità" della lavorazione che vengono poste alla base. Il divano è artigianale, nel senso che viene realizzato secondo i canoni classici e tradizionali, quelli che la produzione su larga scala non può permettersi e che invece il cliente apprezza perché gli consentono di riscoprire e apprezzare un senso di personalizzazione che la produzione industriale non può dare.

POLYFORM ITALIA is born with a strong artisan connotation. And the difference must be emphasized because what is done to produce **POLYFORM ITALIA** sofas is the result of an absolutely artisanal process. The machines are there, it could not be otherwise, but the **POLYFORM ITALIA** products are unique pieces, if not in the actual production but in the design, care and "craftsmanship" of the processing that are placed at the base. The sofa is artisanal, in the sense that it is made according to the classical and traditional canons, those that large-scale production cannot afford and that the customer appreciates because they allow him to rediscover and appreciate a sense of personalization that industrial production cannot give.

POLYFORM ITALIA est né avec une forte connotation artisanale. Et la différence doit être soulignée car la fabrication des canapés **POLYFORM ITALIA** est le résultat d'un processus absolument artisanal.

Les machines sont là, il ne pourrait pas être autrement, mais les produits **POLYFORM ITALIA** sont des pièces uniques, si ce n'est pas dans la production réelle mais dans la conception, le soin et le "savoir-faire" du traitement qui sont placés à la base. Le canapé est artisanal, dans le sens que il est fabriqué selon les canons classiques et traditionnels, ceux que la production à grande échelle ne peut se permettre et que le client apprécie car ils lui permettent de redécouvrir et d'apprécier un sentiment de personnalisation que la production industrielle ne peut pas donner.
